Mass Meeting Points to Progressiveness of City

Bonds Almost Sure to Carry Providing For Water Works, Sewers and Improved Streets

St. Cloud will vote \$125,000 for waterworks and sewers next Tuesday, if the sentiment expressed at the mass meeting on Tuesday can be taken as a criterion for the opinion of the taxpayers in this city.

More than three hundred men and women, mostly taxpayers and voters attended the mass meeting, held at the suggestion of the mayor and city commissioners, to talk over the proposed improvements. But few persons present raised any objections to the whole issue of bonds that will be voted on next Tuesday.

The meeting Tuesday was called to order by Acting Mayor J. J. Cummings, who introduced Hon. Arthur E. Donegan, president of the St. Cloud Development Company as the first speaker. Mr. Donegan said he was willing to leave the expenditure of the bond money to the judgment of the city commissioners, feeling sure that the interests of every taxpayer in St. Cloud would be safeguarded. He believed the proposed bond issue would increase the value of every piece of property within or near St. Cloud. "In fact, every piece of good road constructed within five miles of the city benefits the city," continued Mr. Donegan. "No town in this section will get as much good advertising as will come from such a progressive step as the one now considered. If you don't show progressiveness you will not get the class of new people that is desired," continued Mr. Donegan.

Senator Donegan, representing the new development company handling the lands of the Seminole Land & Investment Company, is one of the largest, if not the largest taxpayer in this city, and such encouragement from that source is very gratifying to the small taxpayers.

W. A. Ginn, of Sanford, the engineer who has been working on the plans for the complete system of waterworks and sewers for St. Cloud, was next introduced, and went into details as to the scope of the system to be constructed. Many questions were asked during his explanations of the maps which were on hand for inspection.

The plans show that the system of both the waterworks and sewerage plant are laid out in substantial main lines, so planned that extensions can be made by the city commissioners as called for by the property owners in any particular section of the city as that part of the city will become settled up with residences.

After many questions had been propounded to Mr. Ginn, the meeting was declared open for a general discussion of the question of bonds, and several important matters were brought to the attention of the voters. Captain L. D. Frost finally gained the floor and went into every detail of the bond issue. Mr. Frost stated that he was in favor of every item in the bond issue and explained that he had studied the plans and specifications, considered the cost of the whole job, and then using the former valuations of city property had figured pretty close to what the cost to the taxpayers would be on the whole issue.

From the thorough explanation made by Capt. Frost there were but few taxpayers and voters present that could make any objection to voting the bonds next Tuesday. It was also learned from Mr. Frost's remarks that the plans included an automobile fire-fighting machine. He estimated that without considering the question of how much surplus might be set to one side from the water plant when the whole city was connected, (which will amount to enough to carry the bonds according to the experience of

other towns), an increase of only four mills will be necessary in the city tax. It was pointed out by Mr. Cummings during the meeting that the cost of the city water service will be regulated by the use of a meter, so that small consumers will pay according to their use, while those who require lots of water will pay for the greater quantity.

After Capt. Frost had given the details of the plan, he stated that he was also going to vote for the franchise for the interurban railway, because he knew that it would help make a great city of St. Cloud.

Rev. Kenney, acting as representative of a great number of veterans, asked several questions as to the cost of the plants, the cost of the service and the benefits of improvements. Each question was given a thoroughly satisfactory answer by the commissioners and the engineer in charge, and at the close of his remarks Rev. Kenney called for a straw vote on the question of carrying the bonds. Of the hundreds of voters present, practically the whole number stood up as favoring the bond issue. When the negative vote was called for it was seen that only seven persons were still opposed to the bonds. If this can be taken as an expression of the opinion of the majority of voters, and a majority were present, the entire bond issue will carry next Tuesday by a big majority.

The editor of the Tribune was asked for some remarks on the question and he called the veterans' attention to the fact that St. Cloud's efforts to go ahead and make a modern city were like unto the plans of battle some great general would plan, perhaps like some of the very battles these veterans had been through. The fight had to start somewhere, and that while St. Cloud could not cover every street within the corporate limits in the construction of sewers and water works, a beginning must be had. The plans now called for was St. Cloud's beginning, with plans that would insure a successful battle for a beautiful city. The editor also called attention to the fact that the younger generation of today were enjoying the comforts provided by those veterans who are nearing the goal, and that the younger generation would not object to being left part of the burden of retiring the bonds, since they would get the greater benefits in the public improvements.

Many enthusiastic remarks were made in favor of the bond issue by other persons all over the house, and altogether the mass meeting proved one of the most enthusiastic ever held in the city.

One veteran stated "the drums never called the people of St. Cloud together in a better cause than when they caused to assemble this mass meeting on this day."

The manner in which the city commissioners handled the question of bonding for public improvements was commended by many speakers, it being termed "a big family meeting of neighbors," and also "a stockholders' meeting with the directors."

The meeting adjourned amid cheers for a greater St. Cloud.

W. B. Makinson Co., whose store has been known as the Flower Bed Store, yesterday opened their doors for a big clearance sale in hardware, house furnishings and building supplies, with sportsmen's goods included. Their full page advertisement carried in this issue of the Tribune shows that they have made some cuts in prices that mean that the goods will move.

COUNTY FAIR RALLY WELL ATTENDED LAST FRIDAY

Delegation From Kissimmee Brought Band and Explained Objects of the Association.

The fair rally held by the Board of Trade last Friday evening was well attended by St. Cloud people, and more than fifty citizens of Kissimmee, beside the Kissimmee Concert Band, were in attendance. The band arrived about 7:30 and gave a few selections at the Seminole Pharmacy corner, and it was soon learned that the number of people waiting for the beginning of the meeting at the city hall could not be accommodated. A hurry call was made for permission to use the G. A. R. hall, which was granted. At the hall the band rendered several selections, which were much appreciated.

The meeting began when President Brammar of the Board of Trade, called on Mr. C. A. Carson, of Kissimmee, to explain the plans of the Osceola County Fair Association. Mr. Carson recited the objects of the organization and told of the amount of stock already subscribed in Kissimmee, and urged that St. Cloud people take the balance of \$3,500 to insure the success of the plan. He stated that there were three vacancies on the board of directors that were being kept open for St. Cloud people. It was pointed out what advantages would result to this section from the establishment of a permanent fair in the county.

After Mr. Carson's remarks, Mr. H. C. Stanford, of Kissimmee, made an interesting talk on the fair and asked

SENATOR DONEGAN SELLS CONTROLLING INTEREST IN THREE STATE INSTITUTIONS

Will Give Personal Attention to Development of St. Cloud Properties—Deal Means Much to County

Senator Arthur E. Donegan this week sold some of his holdings in the Citizens Bank of Kissimmee, the State Bank of Haines City and the State Bank of Eau Gallie to interests representing the Bankers' Finance Company, of Jacksonville. Under the terms of sale Senator Donegan retains from the active management of the Citizens Bank, of Kissimmee, the State Bank of Haines City and the State Bank of Eau Gallie, and his place will be represented by Mr. J. R. Anthony, Jr., of the Bankers' Finance Company of Jacksonville, and president of the People's Bank, of Jacksonville. Mr. Anthony represents the Witham system of banks in Florida and is one of the best known men in the financial world of the state.

There will be associated with Mr. Anthony Messrs. R. L. Hyer and W. M. Davis, of the strong Orlando Bank & Trust Company, of Orlando, Florida.

Senator Donegan will remain on the board of directors of these three institutions, but will turn over the active management to the parties who succeed him.

Mr. Donegan has large outside interests which require his close attention. Having taken over the handling

WATCH THE CORNER WARNING TO TRAFFIC

New City Ordinance Printed Today Regulating Travel Over Streets of St. Cloud.

Due to the fact that traffic over the streets of St. Cloud is on the increase, and some regulation made necessary for the safeguard of the public, the city council has passed a traffic ordinance which sets forth what rules must be observed by vehicles of any kind used upon the streets. The ordinance is published in full on page seven of this issue, and should be read by every citizen of St. Cloud.

Square "keep-to-the-right" guide posts have been placed at the busiest corners in the business section. Fines are provided for the violation of the traffic ordinances, and the general public can aid in the "safety first" movement by co-operating with the city officials in enforcing the new ordinance.

For subscriptions to the stock. Mr. W. C. Bass subscribed for ten shares and C. W. Griffin for five, while several St. Cloud people expressed themselves as willing to take stock. No definite amounts were stated. It was decided to make the question of how much stock would be taken in this city a special order of business at the next meeting of the Board of Trade, many members of that body being absent Friday.

The meeting brought out remarks of a closer relationship between the two cities, it being stated that the two should pull together for the up-building of the whole county.

SENATOR DONEGAN SELLS CONTROLLING INTEREST IN THREE STATE INSTITUTIONS

Will Give Personal Attention to Development of St. Cloud Properties—Deal Means Much to County

of the St. Cloud property he is prepared to start an active campaign for the sale and development of this property. It is the intention of the St. Cloud Development Company, of which Mr. Donegan is president, to open a modern and up-to-date office in the St. Cloud Hotel building, at which place Senator Donegan will have his offices and be in close touch with the rapid development of St. Cloud.

This deal means much to Osceola county, as it affiliates Senator Donegan with some very strong financial connections and will permit him to devote more of his time to the development of his large holdings in St. Cloud.

ANTICIPATING STRIKE

Believing that nothing will be done in time to prevent a tie-up of the railway systems by the strike called for next Monday, to be effective in case an agreement is not reached between the men and the companies, several large wholesale concerns have issued orders regarding the movement of traffic that indicates there is reason to think the strike will become effective in earnest.

Naval stores men in South Florida

A report just issued from the office of the commissioner of agriculture at Tallahassee, gives St. Cloud the distinction of being the only town without a negro population, according to the census taken a year ago. The complete figures for this census have just recently been tabulated and it shows St. Cloud to be the thirty-fourth town in the state in point of population.

St. Cloud is only seven years old. To reach the place of thirty-fourth in population in that short time, when compared with 194 incorporated cities in the state, speaks volumes for the advantages offered here. In these incorporated towns is included the oldest city in America. There were found 123 incorporated towns with a population of less than one thousand.

Florida is not a state of large cities, a majority of the population is rural, the percentage being 9.3 in a total density of 16.7 to the square mile. The number of people living in the county in 1915 was 513,461, compared to 408,157 living in the cities and in the towns, the total of the state being 921,618.

Our climate is an asset, and with right effort Florida can be made the

have received instructions to put in a supply of goods that will be needed to operate their camps at once. Other manufacturers are urged to do likewise by selling concerns. If the strike comes and the railroads are tied up there will be a shortage apparent in many lines within a few days. Many concerns have taken precautions during the past week to stock up for whatever comes on September 4.

SCUPPERNON GRAPES GROW IN ST. CLOUD

Some of the finest scuppernon grapes that have ever been grown in Florida were brought to the Tribune Monday by Mr. N. F. Curtis, who was that day celebrating his 77th birthday. The grapes were grown on a 5-year-old vine that has reached a length of 150 feet and this year produced more than four bushels of grapes. Mr. Curtis has but a small place, but he has made good use of that. In addition to the excellent results obtained with scuppernon grapes, Mr. Curtis also has growing on his place Japanese persimmons, avocado pears, everbearing limes, oranges, tangerines, figs, pineapples, papayas and guavas.

Friends of Mr. Curtis who visit his home at 116 Missouri avenue, express pleasure at the results obtained by him, and say that his example should be emulated by other residents in this section.

Mr. Curtis was married when he was but twenty years old, and his wife was younger than he. They have enjoyed fifty-seven years of wedded life and are glad to be enjoying good health in the Wonder City. Many friends congratulate Mr. Curtis on his 77th birthday, which occurred on last Monday.

Seventeen women from eight States and one from Smyrna, Turkey, were graduated from the Women's Medical College of Philadelphia.

President Wilson last Thursday accepted for the United States the birthplace of Abraham Lincoln at Hodgenville, Ky., authorized by a recent act of Congress. Formal ceremonies transferring the property to the government will take place at Hodgenville on September 4, with the president as the chief speaker.

real flower and beauty state of the Union.

Florida is bountifully supplied by the Creator with things for investigators to develop into usefulness. All about us are growing things, inviting us to experiment with them. The orange was once of no value—being small, juiceless and full of seeds—the apple a sour little crab, and the tomato a supposedly deadly fruit. Investigation has found the cause of many of the maladies afflicting the human race. Apply the knowledge and life is made longer, more efficient and more comfortable. The little pest that has crippled a great industry has been found—the cattle tick—and the remedy is available and easily applied.

Florida is a great state, great in opportunities, in material resources, and in climatic advantages. It is the best located geographically of any state in the Union. Sir Walter Raleigh once said: "The country in command of the sea commands the world." What American state has such a command and access to the sea and the world? A study of the map will confirm this claim. Let every citizen and parent, every boy and girl of Florida study and know their state and they will love it the more, and will help to make it greater and more beautiful.

REGISTRATION BOOKS ARE TO BE OPENED HERE

Voters Must Register To Participate In General Election

Deputy Registration Officer S. W. Porter announces that he will open the St. Cloud precinct registration books tomorrow morning. Voters must register for the general election to be held in November. The registration for the primary does not hold good for the general election. Every person who desires to vote on November 7 must call at Mr. Porter's office and register during the next week. For the convenience of the voters Mr. Porter will often have the office open in the evenings, so that those who happen to be away from the city during the day may call and register at night.

This registration must not in any manner be confused with the city bond election for next Tuesday. The lists of qualified voters for that date have already been checked up and will be on hand at the voting place when the bond question is decided.

ELSIE P. McELROY AUXILIARY HOLD MEETING

The Elsie P. McElroy Auxiliary No. 17, of the Army and Navy Union, met at their rooms in the Masonic hall, Florida avenue and Tenth street, on Monday, August 28th, at the usual hour, with Lady Commander Mary P. Doughty in the chair.

Minutes of the previous meeting were read and approved as read.

Arrangements will be made in the near future for a picnic at Wildwood Grove. The next meeting takes place September 11th. All lady comrades please attend.

BROWARD COUNTY DRY BY GREAT MAJORITY

Every precinct in Broward county last week registered a majority in favor of the "dry" side, the election going for prohibition by an overwhelming majority. Out of 590 votes cast 420 went for prohibition and 170 were registered against.

The election was hotly contested and victory was celebrated by the prohibitionists. Broward has been "dry" since the county was created.

SUMMER COMFORT

How to be comfortable, though warm!

It's a problem not confined to the people of Florida, for to the citizens of the Peninsular state the heat is not so serious a matter as it is in that tier of states just north of the almost forgotten Mason and Dixon Line. In those less favored communities it sometimes becomes a matter of life or death. In Florida it is merely a question of inconvenience. During the present season almost two hundred deaths were occasioned by high temperatures in one "hot spell" in Chicago, more than have occurred from the same cause in Florida, in twenty or fifty years, probably more than during the entire history of the state.

And so in this far southern part of the United States the heat of the summer months is not a thing to be worried about, for it is not dangerous to human life or health, and the matter of being comfortable is the weightiest problem to be considered in connection with the weather.

The normal temperature of the human body is 98.6 degrees, summer and winter, and the work of the heat-equalizing functions of the body is to maintain this degree as closely as possible. The natural variations from it are slight and depend mainly upon individual peculiarities, upon the hour of day or night, the effects of eating and drinking and a few other more or less indefinite causes, but any marked variations from it are likely to be followed by serious results.

Personal comfort depends much upon the rapidity of evaporation of natural moisture from the surface of the skin. Such evaporation is slow if the surrounding air is charged with humidity. If the atmosphere is dry, perspiration is absorbed more quickly from the skin with a corresponding increase of comfort. The draft from a rapidly moving electric fan is reviving because it quickly removes the surface moisture, replacing it with dryer air, even though it does not reduce temperature of the atmosphere.

The matter of personal comfort, therefore, depends largely upon the kind and weight of clothing and also whether the fabric has the tendency to promote the proper and normal evaporation of surface moisture, or to retard it. It is essential that the clothing shall be of such material as to permit as nearly as possible such normal evaporation, and this brings up the question of clothing fabrics best adapted to warm climates.

Cotton and linen are best because the heat and moisture of the body more easily pass through them to the outer air. In colder weather, because of this same degree of conductivity, they are poor protection because they admit the colder air from the outside. These fabrics lose absorbed moisture quickly by evaporation; that is they dry quickly. Wool and silk absorb moisture less quickly and they give it off, or dry, more slowly.

The conclusion follows that cotton and linen are best adapted to summer wear in southern climes, and that as few layers of these materials as are necessary, should be worn, to secure the greatest degree of comfort thru evaporation of surface moisture of the skin.

Summer diet—the kind and quantity of food and drink—has much, very much, to do with bodily comfort. Some foods are heat producers, that is what they are for. You do not need as much meat in summer as you do (or think you do) in winter. Eat fruits and vegetables in preference and don't make experiments with your diet in summer. If you want to take chances, try it in colder weather when the body is better able to withstand shocks and surprises.

Remember that water cooled without actual contact with ice is the best summer (or winter) drink yet discovered. Drink all of it that you want, especially between meals. Bathe often. Keep the body clean and the mind clear. Keep your hardest working for the coolest months, so that your conscience is in good working order and you will find the Florida summer a most delightful season and decidedly comfortable, greatly to be preferred to that of sections much farther north.

DO YOU WANT ST. CLOUD TO GO AHEAD OR RETROGRADE?

**Either We Must Advance or Go Backward
---We Can't Stand Still---Non-Progressive
Cities Decay, Lose Population and Business**

St. Cloud has reached that point in its history when the people must decide whether she will continue to grow, or whether she will go backward. We must have modern conveniences or we shall feel the effect of not providing necessary improvements for the preservation of health and life.

A city waterworks will reduce the fire insurance rate enough to pay the bond issue before its maturity, beside the convenience to every household and business house in the city.

A sewerage system is necessary to the health of the town. Surplus water standing about a city breeds disease. Pure water from a city water plant will provide the means of cleanliness. A sewerage system is a necessity to carry off the water and drain the streets in the rainy season.

There is not a live town in the country without waterworks and sewers. Permanent street improvements are necessary if we would have our city attractive and develop the building of new houses.

It cannot be expected that every street or every house can be provided for in this new system at the beginning, but the plans call for all the populated district, with mains that are ample for extensions as building continues.

We must start on this system some time. When a start is made it will not take long to cover every nook of the city.

When the waterworks is finished customers pay according to the connections they have, so that the small householder does not pay the same rate as a large hotel. And this money is paid to a city-owned plant, which will aid in repaying the bond money. Thus the waterworks will be paid for by its own products.

Read every line of the article below and vote for the bonds on September the 5th.

The auspicious moment is fast approaching when the city of St. Cloud, through her registered realty holders, must march forth and demonstrate what their attitude is relating to the continued advancement of our little city.

Thousands of tourists have been brought here by the advertising and influences of our progressive citizens, and the promoters of the enterprise of making St. Cloud a mecca; a tropical home place for thousands who are weighed with the extra load of declining years.

Thousands have visited our beautiful place and enjoyed the health-building influence of the climate, the balmy air, the splendid moderate temperature, the transparent waters of our crystalline lake, with its charming shore lines of snow-white sand, the fraternal and friendly feeling that prevails amongst the home folks, the business hustle that indicates our thrift and demonstrates our energy, and many other things which help materially in the advancement of our beautiful home city.

The expense and energy has been to a certain extent, wasted along the line of actual settlers. Many that come are used to the handy and labor-saving public utilities which come to the inhabitants of even the smallest towns. The expenditure of thousands of steps a day, which might just as well be taken from the drudge of life, in procuring and distributing the necessary water to be provided for the household use, not to mention the loss of the use of this very necessary commodity in promoting the cheerfulness of the home, by the proper and judicious sprinkling of the grasses and lawns, and for the necessary and frequent requirements necessitated thru the use required for the economical growing of garden supplies and the proper protection of the flowers and trees which are so necessary in the beautification of our home places, and for the promotion of civic and other public benefits.

But last comes the greatest, the protection of our homes from that ruthless destroyer, FIRE.

We have in the past oftentimes held our breath, and only the Providential Hand stayed this grim destroyer of homes from everlastingly wiping out our little city from the land. With a practical fire-fighting system at our command, the distribution of the sparkling "aqua" into the homes, life in St. Cloud will be worth living. And in the looking over of the situation, not the greatest of these public improvements is water.

Hand in hand with advancement also travels sewerage, and sewerage disposal. Sewerage provides adequate means of removing, and leads to the total destruction of the refuse and filth of the city. The sewer is the only proper discharge for the bath and the remains of the polluted water; for the economical carrying off of the human excrement, which after performing the life-giving service to mankind now becomes a perfect poison and a breeding place for the germ life which has in a measure passed from the afflicted and diseased; those who are weak and unable to gather the vital energy required by nature in eliminating from the human system all of the poisons generated from an incorrect method of life, and perhaps formulated by the patient's manner

of living. In this excrement is the desiccated vegetable and animal life, used and dead, putrid and sour and foul. Is it to be hauled through our town at midnight, with a cloud of coal tar, or some other smoke-to-heaven atomizer calculated to be even stronger than the stench in order to relieve the mind from the deadly gases emanating in foul disorder as it streameth and stinketh for the unsuspecting victim sleeping in the homestead by the road way, to breath into the lungs and become poisoned, and perhaps become inoculated with a dread disease which has now only perhaps had its beginning and is destined to rob the bread-winner's strength and ultimately to inoculate an entire family, and where the strong red blood is pulsing through the veins, to infuse through disease the deadly poisons which slow the heart's action and thereby assists in depleting that energy which goes hand in hand with bread winning and good health, and surrendering the family provider and the members of the family to the doctor—not for an examination, advice, and a prescription, but for the rest of your natural life?

The Word Sanitary

This small, unassuming word means more to you, my fellow taxpayer, than any other word printed in the great dictionary we have for our use. It means and outlines the battle of life. With disregard of its use great nations have been ignominiously swept from the face of Mother Earth; great armies have unconditionally surrendered, stacked arms and passed into the stockade from which there is no return.

What Is Disease?

A disorder and breaking down of the system. And system covers the general makeup of mankind—our all. Life is only on detached duty; life only stays with system as a guard to hold the fortification from the enemy—disease; life works hard, night and day, in the guard duties imposed upon it; life is promoted by dynamic force, generated by the consumption of a few simple ingredients, such as oxygen, hydrogen, and a few other simple ingredients that go to make up the human provender, which when rightly fed and properly stoked, furnish the steam for the dynamic force spoken of.

The Enemy, and What it Amounts To

Disease, that dread apparition, is generated and incubated in as many as ten thousand ways. It lurks in your every path; it invades the privacy of your sleeping apartment during the night time; it lurks in the water which you drink; it stealthily upon you from contact with the neighbor's breath; it dives down from the neighbor's sink, or from the lodge cess pool ten town blocks south of you, it sinketh away from a nearby town or a hundred or a thousand of your neighbors.

Ordinary mankind does not study this important and very active enemy. Life is so short and sweet that the most of them would rather die than to be even bothered with paying the small price for a sanitary wagon to back up and haul the filth away.

Would you have a school without a teacher? A bank without a cashier?

Well, it is just as imperative, and more sensible, than to have a town without a sewer—a sewer working

both night and day, carrying your dirt, filth and gasses away.

You get up sick in the night and O Joy! what a blessing. Fresh, clear water and a sewer. What a splendid servant is this sewer. It saves ten thousand steps a week. It is more pleasure than gold; it conserves health and that promotes life.

That is what we want. Real and enjoyable life. In real American money we spend \$9,785,675,853.00 of the world's wealth each year fighting this monster and the vast army of fighters are winning new territory each day.

Can We Afford To Take the Risk?

Our stock in trade is our homes. Our capital is our loved ones. The bright and cheerful faces our prosperity. Can we afford to run on and take the chances which become greater every living day? Do we begrudge a little insurance? Our fellow townsmen, is it cheaper to take the risk and some day wish that we had been selected as the sacrifice instead of that other one?

It is due time for the good friends, neighbors and well wishers of our little city to get together, each put the helping shoulder to the wheel and try and put us safe and sound on the other side of the mire of indecision and danger to the lives of every living man, woman and child in this town. The time is almost here. Are we to move to the front, or are we going to retrograde and go backward and lose the advance which we are justly entitled to make in order to keep in the procession of fast moving Florida cities? But a few years ago and we were only starting.

It is now time to make a decisive step, and the determination to move forward is in keeping with the motto of St. Cloud, Comrades, Guide right, Forward, March.

Vote for waterworks, sewers, and other improvements on September 5.

Subscribe for The Tribune.

RE-ARREST THOSE WHO ESTREAT THEIR BONDS

St. Pete Judge Will Enforce the Law

According to Judge C. J. Maurer, police court judge, the forfeiture of the bonds does not make the person summoned exempt from appearing in court.

The theory of Judge Maurer is that the bonds placed on a person are by no means equivalent or a reparation for the crime, and merely placed on the person to assure the court that he or she will appear for trial without the disgrace of being placed in jail.

BEREAVED

("The best thing I ever did," was James Whitcomb Riley's own rating of this poem of his, according to a letter from Mr. Reginald Wright Kauffman recently printed in the Tribune.)

Let me come in where you sit weeping—ay,
Let me, who have not any child to die
Weep with you for the little one
whose love
I have known nothing of.

The little arms that slowly, slowly
slowly looked
Their pressure round your neck; the
hands you used
To kiss. Such arms—such hands I
never knew.
May I not weep with you?

Fain would I be of service—say some-
thing,
Between the tears, that would be com-
forting—
But ah! So sadder than yourselves
am I,
Who have no child to die.

PROCEEDINGS COUNTY BOARD OF EDUCATION

Kissimmee Fla., Aug. 7, 1916.

The school board met in regular session, there being present W. C. Bass, chairman; J. S. Stratton and Walter Bronson; also C. E. Yowell, superintendent.

The minutes of the last meeting were read and approved.

S. L. Luffey, county treasurer, reported as follows:

To the Honorable Board of Public Instruction in and for Osceola County:

I herewith tender my report as treasurer of Osceola county for the month of July, A. D. 1916:

General School Fund

Warrants were examined and

cancelled in open session.

A. W. Mann appeared before

the board and offered to buy the lot and

old building of School No. 10 for \$600,

provided the board would accept his

note for six months with interest at

ten per cent per annum in payment for

same. The board decided to accept

the offer and directed its attorney to

draw up a deed to said property and

deposit same with note in the State

Bank, the deed to be released on pay-

ment of note by Mr. Mann.

A petition from the patrons of

School No. 20, West Kissimmee, col-

ored, was presented to the board,

asking that another principal be ap-

pointed for the ensuing school year.

After duly considering the matter the

board decided to make no change this

year.

The board decided to put in a course

of domestic science in the Osceola

High School, and appointed Chair-

man W. C. Bass, R. M. Evans and C.

E. Yowell a committee to procure a

teacher and the necessary equipment

for the course. The same committee

was directed to have an extra room

built onto the old church building for

the accommodation of the B. division

of the third grade, and to have other

necessary repairs made.

Application from John Owens and

Mrs. O. R. Bebee for the contract to

transport the pupils to School No. 5

were read before the board. The

board decided to let Mrs. Bebee haul

the pupils until the next regular

meeting in September when the mat-

ter would finally be decided. In the

meantime the county superintendent

was directed to write to Mr. Owens

and Mrs. Bebee and ask that each pre-

pare a map showing the location of

the homes of the children to be hauled

and the route and the distance each

proposed to travel, and submit same

to the board at its next meeting.

A petition from the trustees of

Sub-school district No. 3, asking that

J. S. Carter be allowed \$10 per month

to haul his children to the Greely

school was presented to the board.

After due consideration of the matter

the board decided not to grant the re-

quest.

The board made the following ap-

pointments: Miss Effie Bass, teacher

of School No. 10, Bassville; Miss Hel-

len Jones, teacher of School No. 12,

Narcoossee; Miss Lessie Haye, assist-

ant school No. 28, Bassenger; J. E.

Williams, teacher of School No. 5,

White Leaf Bay; Mr. J. R. Figart,

janitor of School No. 16, St. Cloud,

at a salary of \$27 per month.

The returns of the elections held

in Special Tax School Districts Nos.

3, 4 and 5, on the 6th day of July, A.

D. 1916, for the purpose of determin-

ing who shall serve as trustees of said

districts for the two years next after

the elections and to fix the number of

mills of district tax to be levied and

collected annually for the said two

years, having been received, the board,

on motion duly seconded, proceeded

to canvass said returns and found as

follows:

FLORIDA SCHOOLS AND COLLEGES

LOYALTY TO HOME INSTITUTIONS

(By W. A. McRae, Commissioner of Agriculture.)

If "Buy at Home" is a good slogan, what's the matter with "Attend Florida Schools"?

Just at this time catalogues of schools located in distant States are being studied by parents in various parts of Florida with a view of sending their children to some of these far-away institutions.

Children of Florida parents will leave in a few weeks to resume their studies in distant schools, the job of catalogue studying having been completed last year or the year before.

There are good schools in other States, but they are no better than we have in Florida. There may be larger buildings and more students in the schools of more populous States, but the opportunities for acquiring knowledge are just as good at Gainesville, Tallahassee, DeLand, Winter Park, Lake City, Sutherland, Tampa, Orlando, Jacksonville and other points in Florida, as at schools we could name in other States. Distance, however, seems to lend enchantment.

Boys and girls who leave Florida and spend years away from the home State form acquaintances whom they must leave behind when they return comparative strangers to their own community. Whatever the calling is that may be contemplated by boy or girl, it is better to get a knowledge of it among the people they expect to live with.

No one can question the ability of the teachers at the Florida State University, the Florida State College for Women, and our other universities and colleges. Some are graduates of great schools of learning in America and Europe, and have taught in great schools. There are books of reference on every possible topic in the libraries of Florida schools. Every facility known to education is available.

The courses of study are comprehensive and complete.

Young men who contemplate professional life, by attending our home schools, make the acquaintance and win the friendship of hundreds of others who are to become the future men of affairs in Florida. At school in Virginia, Tennessee or Kentucky, means an acquaintance with those whom the Florida boy may never meet again. The coming young men of Florida, graduates of Florida colleges, have common interest in each other.

Conditions are different in different States. The laws are different. Crops and material resources differ. Manufacturing interests are different. Therefore the need of young men and women of a State being educated in their own State in whatever may be their bent, and at the same time familiarizing themselves with all phases of life in a commonwealth in which they are to play a part. This will not be an easy matter if the character-forming period is spent in a distant region.

The catalogues of the Florida State University at Gainesville, the Florida Women's College at Tallahassee, the

Stetson University (Baptist) at DeLand, Rollins College (Congregational) at Winter Park, Columbia College (Baptist) at Lake City, Palmer College (Presbyterian) at DeFuniak Springs, Southern College (Methodist) at Sutherland, Florida Military Academy at Jacksonville, St. Leo College (Catholic) at St. Leo, Central Normal College at Dade City, Florida Normal Institute at Madison compare worthily with the best of any in the land, and the work of each is annually evident in scores of young men and women who win records of having been faithful and intelligent in their studies, each going forth fully equipped with first-aid needs in beginning the battle of life. And with their mental equipment THEY KNOW FLORIDA.

All Year Work of University

The business of a modern educational institution like the State University, the preparation of young men for their life work in various professions, is becoming a highly specialized industry, and a continuous labor through practically all months of the year. The present ideas of efficiency teach us that the splendid plant and equipment of such a school should not be permitted to lie idle many days in the year, but should be used in all seasons and for all good purposes. Many of the universities of other states are now in operation the year round, including a summer term or quarter.

The same plan is coming into use at the University of Florida, and the demand for all year instruction increasing. With this in view, the teachers of the state have requested and secured the splendid summer school which closed early in August, and additions to the summer work are being made every year, until the University will in the near future never find time to close its doors.

During the month between summer school and the regular fall term, it might be posed that the University, dear old Alma Mater, would have time for a little rest, a breathing spell of a few weeks. But such is not the case this summer, no rest is possible, he is too busy making ready for the inflow of old and new students who will come about the middle of September repairing the worn places caused by work and play, putting on a new bit of dress here and there, enlarging and improving in all points possible, preparing for better work than ever in the educational field.

The army of summer school students has therefore given way to a busy force of workmen who are putting buildings and camps in condition for the opening of school. This work is being done by direction of the president and under the supervision of Dr. Anderson, acting president; Professor Cawthon, officer in charge of dormitories and the faithful auditor, Mr. Howard.

The dormitories are receiving special attention, to have the living rooms for students in first class condition; many rooms are being touched with plaster, others are treated with tints or murex; the screens, doors, locks, and keys, electric lights and fixtures in toilet and bath rooms thoroughly overhauled and put in first class working order. Finally, all rooms are to be thoroughly fumigated by an expert sanitarian, using the most modern disinfecting methods. The University believes this expense well worth while, in order to protect the health and daily well being of its patrons, and avoid the possibility of communicating even minor diseases. The comparative freedom of students at the University from such epidemics as malaria, measles, mumps, etc., attest the efficacy of sanitary methods, and not a single case of typhoid fever has occurred for a number of years.

The dormitory will again be in charge of the efficient matrons, Mrs.

Swanson and Mrs. Peeler, who will begin duty on September 1st, and have all furniture in rooms in good shape. Some of the students are expecting to return early in the month, especially those who lead in the work of athletic teams.

The campus and grounds of the University are receiving their share of attention, including mowing of lawns, grading and smoothing of roads, and in some unused parts of the grounds Superintendent Byrd is now gathering a crop of hay for winter feed of the patient campus mules, and tending a large patch of sweet potatoes for future use at "Mess Hall." The fence enclosing Fleming Field, the athletic grounds, is being repaired and rebuilt in places, the tennis courts are in good shape, and in general the campus will soon be in holiday attire. All academic buildings will be thoroughly cleaned, floors stained, walls and windows brightened, minor repairs for another year of work, believing it will be called upon to welcome a larger body of students than ever before.

Fraternity Will Build Chapter House

The Alpha Tau Omega Fraternity at the campus purchased a splendid lot immediately east of the campus last spring with the idea of erecting a chapter house at the earliest opportunity. The building committee of the fraternity held a conference last week in Gainesville with Mr. W. A. Edwards, architect for the Board of Control, and accepted plans for the new fraternity home. It is planned to let the contract in a short time and tried to have the home finished by Christmas. The building is to be two and a half stories high, with a large reception hall, study rooms, bed rooms, several sleeping porches, to be equipped throughout with all modern conveniences.

Personal Items.

Dr. E. W. Berger, entomologist for the State Plant Board, left Thursday for Berea, Ohio, for a three weeks vacation with his family and among his relatives at that point.

Prof. R. N. Wilson, entomologist in charge of the special work of the Bureau of Entomology of the U. S. Department of Agriculture in Florida has returned from a vacation with his family at Daytona Beach.

ST. CLOUD TRIBUNE

Published Every Thursday by St. Cloud Tribune Company

Entered as Second-class Mail Matter, April 28, 1910, at the Postoffice at St. Cloud, Florida, under the Act of Congress of March 3, 1879.

The Tribune is published every Thursday and mailed to any part of the United States, postage free, for \$1.50 a year, 75c six months, or 50c three months—strictly in advance.

Reading notices in local column 10 cents a line. Rates for display advertising furnished on application.

Advertising bills are payable on the first of each month. Parties not known to us will be required to pay in advance.

In changing your address, be sure and give former address.

SUBSCRIPTION, PAYABLE IN ADVANCE, \$1.50 A YEAR

Is St. Cloud growing? Are her people progressive? Watch the vote on the bond issue for waterworks on next Tuesday. The result will prove what the future has in store for the veteran colony.

"Cleanliness is next to Godliness." Everybody knows that. But it takes a modern water system and sewers to keep a city the size of St. Cloud clean. And no good citizen would like to be called unclean.

Automobile owners who use the streets of St. Cloud must now take notice that our city fathers have "laid down the law" for traffic, and that great care must be taken for the safety of pedestrians and other persons who use the streets. Better read the law in this issue. Safety first may save a fine, if not accidents and damage suits.

It takes a call from the life and drum to get a meeting of progressive citizens together in the Wonder City. That the veterans of this city are progressive when it comes to public improvements was demonstrated at the mass meeting held in the G. A. R. hall Tuesday afternoon. Every indication points to a vote of 90 per cent or the veterans for the whole bond issue on September 5.

Not many weeks until the sportsmen will turn their eye toward Osceola county. As soon as the laws of the state will permit, the woods will be full of persons who enjoy bagging game. And Osceola county is unequalled for hunting. Better polish the old shotgun or clean that new rifle and put in a supply of ammunition before the war in Europe makes the price of shells too high.

Thirty-fourth in size out of one hundred and ninety-four incorporated towns, and only seven years old! Not been incorporated that long. That's a record to be proud of. But St. Cloud will take another step toward the top of the list next Tuesday and vote water works and sewers for the city. The next census will show us crowding some place in the state for third or fourth in point of population.

Judge James W. Perkins declared that the bond issue voted in Special Road District No. 2 were valid, when that question came before him last week at DeLand. Persons who oppose the bond issue announced the case would be taken to the supreme court for final adjudication. Two large land owners objected to the bond issue and attacked the validity of the law under which the bonds were voted, setting forth that the amount of money to be used had not been apportioned equally.

Orlando people are reported to be holding back about giving a right-of-way through the city to the Central Florida Interurban Railway. We have knowledge of several towns in Florida that assumed the same attitude toward the steam roads when they came down this way, and they have lived to regret their narrow-minded view of the development made by a new railroad. We hope the Orlando people will not miss this opportunity of helping get an electric road through Central Florida.

Senator Arthur E. Donegan, president of the St. Cloud Development Company, which concern has taken over the lands of the Seminole Land and Investment Company, proved his interest in the welfare of the town when he appeared at the mass meeting of taxpayers Tuesday and expressed his hearty interest in every public improvement, especially when the people came together like they did Tuesday, and discussed the affairs in a body. Senator Donegan assured the

taxpayers that his company, although probably the largest taxpayers in the city, did not object to an increase in taxes if necessary to secure the waterworks and sewers. He takes the broad-minded view of the matter and states that every road or other improvement made within five miles of the city adds to the value of city property. Such men are the kind that make cities grow, and are the kind that are much to be desired in any community.

St. Cloud enjoys the distinction of having a commission form of government with a charter that her people may change to meet the demands of the city as it grows. Furthermore, we are blessed with a city commission acting in the capacity of a city council that takes the taxpayers into their confidence and holds open meetings to discuss public improvements. We always know what's going on, and political fights are kept out of city affairs. Our city government offers a model that several neighbor cities might do well to copy.

The Tribune starts on its eighth year with this issue. We have seen the town grow from nothing to thirty-fourth place in point of population, out of one hundred and ninety-four incorporated towns in this state, and that is enough reward for the boosting to allow us to feel an envious pride in being a part of the town. We look forward to even greater things in our career as the messenger of good cheer to over six thousand people who read our columns each week. Our friends are good friends, and we are encouraged to try for greater development by the success of the past. With the continued co-operation of our people we will improve with age.

VETERANS' ASSOCIATION

Meeting called to order by President W. F. Kenney. Song by the choir, "America." Prayer by Rev. Beauchamp. Song by the choir, "Nellie Gray."

An invitation was extended to all new-comers for remarks.

Following is a list of social hour leaders chosen for the next month: First Saturday, Mrs. E. Murphy; Second Saturday, Mrs. P. E. Morgan; Third Saturday, Mrs. E. C. Kenney; Fourth Saturday, Comrade John Andrist; Fifth Saturday, Charles Miller. The St. Cloud yell, as adopted, is as follows:

Hip, Hip, Hurrah!
Hip, Hip, Hurrah!
St. Cloud has come to stay!
It's getting bigger every day;
Wonder City U. S. A.
Song by choir, "My Bonnie."
The collection for the hall amounted to \$1.31.

Recitation, "The Boy and the Farmer."

Our friend, Mr. Durham, of the department store, sang by request that beautiful piece, "The Holy City." He was encored but failed to respond. Reading by Mrs. Gould.

Song by Miss Bonnie Kicketts and Lynn Daugherty, accompanied by Edith Harrod on the piano.

A special invitation was given by the president to all to attend the address on the city bond question, on Tuesday, the 29th of August, at the G. A. R. Hall, at 2 p. m.

An essay on "Woman," by W. F. Kenney.

Reading of a poem entitled "A Female Politician."

Song by Mr. and Mrs. Williams, "Old Black Joe."

Irish jokes by Mr. Charles Miller.

Song by Leon Harrod, accompanied by Edith Harrod on the piano.

A solo by Mr. Perkins.

Song by Miss Constance Harris,

with piano accompaniment, "Only You."

Piano solo by Mrs. W. J. O'Brien, "Purity."

An old-fashioned drill of the manual of arms, by Comrade Stout.

Reading by Rev. Beauchamp entitled "The Flag," and other selections.

Recitation by Mr. McKay, "Asleep at the switch."

Meeting closed with the audience singing "The Star Spangled Banner." H. H. Mason, Asst. Sec.

HOME FOLKS HOLD A MERRY GATHERING

Last Thursday, at 9:30 o'clock a jolly company of sixty St. Cloud folks gathered at Cypress Hall to enjoy an old-fashioned picnic and otherwise enjoy an outing. The gathering bivouaced in Mrs. Cass' yard under the beautiful moss-covered trees and then unleashed itself and joy ran unconfined. The affair was in honor of the Rev. G. W. Brown and wife, who, of course, were in the midst of the hilarity and were the keenest enthusiasts of the crowd. The tables carried an unprecedented lot of good eats that would have made the average epicure smack his lips. Of course, it is useless to remark that most of it disappeared after the company had been seated at the board, so much so that several remarked that they did not care for any supper. Mr. McCoy proved himself an excellent table waiter, and with the assistance of his better half, and father, managed to keep all present well supplied with all that was there.

After the feast the table was cleared and the organ brought out, and all joined in singing old-fashioned tunes, such as were popular in the day when many an old gray-haired vet of today was a lad and a-courin' went. Having sung themselves out the party then made a pilgrimage to the banks of the canal and there had their pictures taken by Professor McCoy. His camera escaped whatever calamity was in lurking (some of the grimaces displayed before its all-seeing eye were truly dangerous) for he afterwards made another shot at the crowd as they were dipping in the lake. Well, anyway, everybody had the time of their lives, and the only regrettable thing is that Rev. Brown and his estimable lady are going to leave us in a few days. They will go to Sanford by rail, and from there up the St. Johns river to Jacksonville. From there they go to New York by water, then by rail to Canton, Ohio. We all wished them a pleasant journey. They expect to return within the next two months, if all is well.

ENJOYABLE SOCIAL

A very pleasant social event took place at the home of Mr. and Mrs. Lemuel Williams on Michigan avenue and Fifteenth street on Tuesday evening, August 27th, when they gave Mrs. Vine Beebe, a daughter of Mrs. Williams, a surprise party. About twenty-five friends gathered at an early hour to do her honor and have a good time. The entrance and porch were gaily decorated with Chinese lanterns. Inside the house was a glow of light. The dining room was tastefully decorated in colors, red predominating, and in the center was a table filled with delicious-looking cakes, and occupying a central position on this table was an immense chocolate cake with the inscription, "Birthday Greetings, Beebe," done in candy and icing.

Mrs. Buckmaster and Viola Van Natta and Paul and Floyd Northrop entertained with some very interesting, and Lynn Daugherty favored with a tenor solo, "Just Before the Battle, Mother."

The guests marched into the dining room for lunch to music by Miss Van Natta. The lunch consisted of real lemonade and as good cake as you ever ate. It was all very nice and appetizing, and tasted like more.

Games were indulged in by the happy bunch on the large front porch. Just before saying good night the hostess suggested we sing "What a Fellowship," which was done with a hearty good will.

Mrs. Williams has the happy faculty of making everybody feel at home, so no one felt ill at ease. The party dispersed about ten o'clock, wishing Mrs. Beebe many more enjoyable birthdays.

Mr. and Mrs. E. O. Nichols entertained a few friends and customers with an auto drive yesterday. The guests were Mr. and Mrs. Vreeland, Mrs. Veeder, Mrs. Jaques, Mrs. and Miss Fritz, of Lexington, Miss. and Mrs. Dale. The party left St. Cloud at 8 a. m. for Wekiwa Springs, where they intend bathing in the Fountain of Youth, then visit Apopka, Orlando, and other places. At the time of closing our office last night the party had not returned, but we expect an account of their adventures for our next week's issue.

SUBSCRIBE FOR THE TRIBUNE

INTERURBAN SURVEY MAY START IN FEW WEEKS

Engineers To Be Instructed to Begin Work, Prospects Good For Early Building.

Wylie & Reynolds, engineers, of St. Cloud, will start the preliminary survey for the Central Florida Interurban Railway some time during the month of September, according to C. D. Brenner, who was in St. Cloud Monday, having returned from an inspection of the western part of the route to be traversed by the new railroad.

Work of securing grants for the right-of-way has started and will be continued until the entire line from St. Cloud to Melbourne on the East Coast, and from St. Cloud to Kissimmee and Orlando and Sanford in Central Florida, and Inverness and Dunellen, near the West Coast, is secured. It is not known what attitude the citizens of Orlando will take in regard to granting a right-of-way through that city, but people who are in a position to know state that the city will make a mistake if the new road is permitted to change their route to leave the city off the line.

Mr. Brenner stated at the Tribune office that the western part of the route he inspected was entirely satisfactory as to the opportunity for development with railroad service, and that the natural resources of that section was sufficient to warrant him recommending the building of the entire line as soon as the right-of-way is secured.

A feature that appealed to Mr. Brenner all along the route, from the East Coast to the western route of the road, was the vast acreage that could be opened to cultivation as soon as transportation was provided. Truckers can have their own packing houses along the line of the railroad, and lands within three miles of the road, for a distance of over 200 miles, can be developed into paying farms and groves, and no long hauls of the product to transportation will be necessary. The road will give Clyde Line connections at Sanford, Seaboard Railway connections at more than one point, and these competitive lines will tend to improve the service over the railroads now operating in this section.

St. Cloud will come to the front as the home of this new railroad, and lines will radiate from this city to cover the surrounding territory. The franchise for the road through the city of St. Cloud will be voted on September 5, our charter providing that such privileges be granted by the people themselves, instead of by the council. To grant this right-of-way costs the city nothing, and will mean the development of the city when the road is started. This election will be a test of the idea of letting the people vote on such matters. It will decide whether the general public gives enough study to such matters that they are able to vote intelligently for the betterment of local conditions.

A separate ballot will be used at the election next Tuesday for voting to grant a franchise to this railroad.

PRESBYTERIAN CHURCH

At the Presbyterian church, on the third of September, the theme for the morning sermon will be: "The Need of the Present Hour."

The theme for the evening sermon will be: "God's Favorite Hours."

After the morning service a congregational meeting will be held to consider the question of calling a pastor. All interested are requested to be present at the morning service and remain for the after meeting. All strangers in the city and all not identified with any other church of St. Cloud are invited to worship with us. Silas Cook, Acting Pastor.

Presbyterian Notes

The fourth Young People's service was held in the Presbyterian church on Sunday evening. The topic was "Carelessness Against Thoughtfulness." The leader was Constance Harris.

This topic is one which we can all apply to our daily lives, for we should all be less careless of our time, of our words and our actions and be more thoughtful of others.

The special music for the evening was a violin duet, "Beyond the Shadows" by Paul and Floyd Northrop, and a solo, "Some Day," by Bonnie Ricketts.

Next Sunday evening the meeting will be in the Methodist church; the topic will be "The Greatness of God." The leader is Miss Ethel Portis.

The House re-passed the army appropriation bill, vetoed by President Wilson, leaving out the revised articles of war, part of which caused the President to veto the bill.

Dated June 12, A. D. 1916.

J. L. OVERSTREET,

Clerk Circuit Court, Osceola County, Florida.

NOTICE OF APPLICATION FOR TAX DEED UNDER SECTION 574 AND 575 GENERAL STATUTES OF THE STATE OF FLORIDA.

Notice is hereby given that A. F. Bass, purchaser of Tax Certificate No. 385, dated 11th day of July, A. D. 1916; 333 and 336, dated 6th day of July, A. D. 1914; 302, dated 1st day of July, 1913; 340 and 341, dated 6th day of July, A. D. 1914, has filed said certificates in my office and has made application for tax deed to issue in accordance to law. Said certificates embrace the following described lands lying and being situate in Osceola County, State of Florida, to-wit: Lot 70 of the Seminole Land & Investment Company's Subdivision of Section 17, Township 26 South, Range 30 East, Lots 36 and 37 of the Seminole Land & Investment Company's Subdivision of Section 19, Township 26 South, Range 30 East; Lots 43, 44, 45, 46 and 47 of the Seminole Land & Investment Company's Subdivision of Section 20, Township 26 South, Range 30 East.

The said lands being assessed in the name of W. H. Cornhill, H. Peters, F. M. Grierby, S. Slaughter, Unknown and W. H. Sexton, at the date of issuance of said certificates. Unless said certificates shall be redeemed according to law, tax deed will issue thereon on the 31st day of October, A. D. 1916.

Witness my hand and official seal at Kissimmee, this 30th day of August, A. D. 1916.

J. L. OVERSTREET,

Clerk Circuit Court, Osceola County, State of Florida.

BLACK ANTS.

This remedy is recommended by the United States Department of Agriculture to get rid of black ants, and sometimes succeeds where others fail. Boil together water and sugar and borax, making a syrup. Set this in shallow dishes where ants can get at it. They will eat it and leave.

ST. CLOUDLETS

COMING VISITING GOING

Fire insurance, taxes, A. E. Drought, S. W. Porter, real estate, insurance.

Nurse Williams and daughter, Mrs. Bebee, spent last week at the lake.

Mrs. Oliver Knight, who has been sick for over a week, is improving.

Mrs. Mahoney, of Sanford, sister to the Ryan brothers of this city, is visiting W. Ryan.

Miss M. May writes that she is having a fine time and expects to be home some time in October.

Mr. and Mrs. Davis, who have occupied the Wm. Worth cottage, have moved back to town.

Mr. Mike Peterson's little boy is laid up with a severe cold which he evidently has injured in a fall.

Mr. and Mrs. A. Harmon had for their guest Mrs. Mary M. Veeder at dinner Sunday, at the Lakeview.

Milford George is under the weather and Harry Goss has taken his place on the ice auto for a while.

Mr. and Mrs. Van Natta, who spent last week at the lake, returned on Monday to their home on Florida avenue.

Mrs. N. L. Edwards will entertain the Thimble Club Friday afternoon at the home of her mother, Mrs. Arrowsmith.

Mrs. M. Woodward, of Dakota avenue, was entertained at dinner by Mrs. A. Hill, of Maryland avenue, on Monday last.

Coming, the great serial, "Mysteries of Myra," at the Palm.

Mr. Perkins and family ate Sunday dinner with Mr. and Mrs. Madison and attended church at Cypress Hall in the afternoon.

On last Wednesday Mr. and Mrs. Stilwell entertained Mr. and Mrs. H. H. Mason. They were old friends in Wisconsin together.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

Mrs. Grace Ashton, of Catskill, N. Y., is visiting her father. She is suffering from blood poison in her foot, otherwise she is feeling fine.

Comrade Samuel Hobson and wife went on a picnic party Wednesday to visit the lands of their son, C. N. Fisher, in Section 23, near the city.

There will be preaching at Cypress Hall next Sunday, as usual, as Brother Brown has business interests that will detain him here another week.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

Mrs. M. L. Evans and grandchildren, who have been spending the summer with Mrs. O. L. Buckmaster, left Tuesday for their home in St. Louis.

Rev. and Mrs. Brown and their friends, Mr. and Mrs. Wiley and children, motored to Orlando one day last week and enjoyed the sights of the town.

Mr. Wood had a splendid crop of Natal grass. Mrs. John Padgett worked it up for him and had no trouble whatever to get it cured into the best of hay.

Mr. J. Nelson, of Wisconsin avenue, who left last Saturday to visit his brother who was in a dying condition, arrived in time to see him alive. He passed away the next day. Mr. and Mrs. Nelson will return to St. Cloud after the encampment.

A. S. Cole and wife arrived last Thursday from a pleasant visit to relatives and friends in Chicago, Illinois and to their old home in Lewis county, Kentucky.

Wanted, clean rags, by the Tribune, large pieces preferred.

Mr. and Mrs. D. Homer Jennings have returned to town from Bridgeport, Conn. Both expressed themselves as being very glad to get back to their Florida home.

Levy Shambow and wife have returned from Monida, Mont., where they visited Mr. Shambow's old home. They also visited Salt Lake City, Helena, and other places.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

Mrs. A. Robinson's daughter, Mrs. Maury, left for Jacksonville to meet Mr. Maury, who is on his way from New York. He expects to visit St. Cloud before returning North.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

Mr. and Mrs. C. O. Wiley and two children, Georgia and Clyde, of Cleveland, Ohio, were guests of Rev. and Mrs. Brown at Cypress Hall last week. This was their first visit to Florida and they thought it fine.

Mrs. L. U. Zimmerman returned last Friday from a six weeks visit in Pennsylvania and Ohio. She reports the weather very warm and knows now that she came home to get cool.

Coming, the great serial, "Mysteries of Myra," at the Palm.

Will Montsdoca, our genial city marshal, is rejoicing over the return of his family from their vacation. They will shortly occupy their new home on Dakota avenue and Twelfth street.

Dr. Riddle was the recipient of a pretty scarf pin for his birthday, on Saturday, August 20, from some one in Missouri. We congratulate him on his 29th milestone and wish him many more.

W. G. McMakin and wife, of Ft. Wayne, Ind., will return to St. Cloud in November, this being their fourth trip. They expect to bring quite a number of Ft. Wayne people with them.

When you are in need of 35-inch bleached or unbleached sheeting, calicos, gingham or blue shirting just remember Uncle Josh is the cheapest and will save you money. H. C. Stanford Company.

Nurse Williams and daughter, Mrs. Bebee, and Mr. and Mrs. VanNatta, are spending a week at Cypress Hall and think they are having a fine time. They are taking two dips a day in the lake and say the water is fine.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

W. S. Freeman has purchased two lots in St. Cloud, located on New York avenue and Seventh street, where he will build a comfortable home within the next few weeks. Leon Lamb made the sale to Mr. Freeman.

W. H. Milsom, who has become known throughout this section as St. Cloud's cigar manufacturer, is expected to return home September 6th, and it is understood he will bring several persons with him. The cigar factory will be opened again on the arrival of Mr. Milsom.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

Don't fail to see Mr. Paul Jones, from Echo Springs, and Mr. I. W. Harper, from Green River, when they appear at the Kissimmee Concert Band Minstrel Friday night, at the Casino theatre, Kissimmee.

G. M. Davis returned last Thursday from a three months trip through Iowa, Indiana, and Illinois, but was compelled to come back to St. Cloud to escape the heat. The nights were especially uncomfortable. Mr. Davis says St. Cloud is all right for him.

Friday night the Kissimmee Concert Band will have their first annual minstrels at the Casino theatre, Kissimmee. The program is a "dandy," and the money will go to help better equip the band. St. Cloud people are especially urged to attend.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

J. D. Alexander, who came to St. Cloud but a few weeks ago, purchased two lots from Leon Lamb this week, and it is believed Mr. Alexander will make improvements at an early date. Mr. Alexander was one of the pioneers on the Ohio river in the early days when steamboating was at its height.

J. M. Willson, Jr., one of Kissimmee's progressive business men, returned home Sunday from an extended trip to New York. Mr. Willson was pleased at the news that work was progressing on the interurban railroad, and says he always knew St. Cloud could do things other towns could not attempt.

Bailey's transfer service will be resumed on regular schedule on September 15, affording auto trips to and from Kissimmee during the winter season. Connections are made with noon and midnight trains during the time the Tampa Special is operated over the Atlantic Coast Line.

A meeting of the directors of the St. Cloud Canning, Packing and Manufacturing Company was held at the office of the president last Monday. It is reported that parties desire to rent the factory and commence operations within a short time. Very advantageous terms were offered and it is expected that arrangements will very shortly be concluded and the manufacture of preserves will be inaugurated. We understand that a New York house has engaged the entire produce of the plant.

Attend the Kissimmee Concert Band Minstrels Friday night. Better than big road show, at half the prices, 25c, 35c and 50c.

The following paragraphs were taken from the Pleasantville (N. J.) Press.

Rev. J. B. Westcott, of St. Cloud, Florida, grand chaplain of the G. A. R., of that state, and of the P. O. S. of A., will preach at the First Presbyterian church, this city, next Sunday morning. A large congregation is expected to be present to listen to this eloquent speaker. Mr. Ezra A. Lake, clerk of the Session, will have charge of the evening service. Other services will be conducted as usual.

Harry Jenness, son of Mrs. J. B. Westcott, will have charge of the services at the Atlantic Rescue Mission Saturday evening. Many friends from here are expected to be present and take part in the meeting in various ways by speaking and singing.

NOTICE TO THE PUBLIC

Do not forget that the franchise for the Interurban Railway passing through St. Cloud will be voted on next Tuesday, Sept. 5th. Be sure and mark your ballot for the road.

Sidney J. Catts, who holds the Democratic certificate of nomination for governor of Florida, will speak at Kissimmee Saturday evening. It is stated that Mr. Catts' time is taken up making speeches in various sections that call for him, and he will be kept going until the general election on November the 7th.

A chorus of fifteen people and a ten-piece orchestra is only a part of the program at the Kissimmee Concert Band Minstrels Friday night at the Casino theatre, Kissimmee. Admission 25c, 35c and 50c.

Willie Cashbaum sustained painful but not serious injuries last Thursday evening when a small frame building which he was demolishing fell to the ground, heavy timber pinning him down. He was rushed home and given medical attention. His injuries were very painful but it was learned that no bones were broken, and he is expected to recover in a few weeks.

The great collection of musicians and fun makers ever seen on the stage in Kissimmee will appear Friday night, and if you appreciate good music or a good laugh you certainly have to look forward to attending the show at the Casino, Kissimmee, Friday night.

J. C. Benjamin, agent for J. D. Adams Company, manufacturers of the "Adjustable Leading Wheel Grader," one of which machines the county has invested, was in Kissimmee on August 27th. Mr. Benjamin received flattering accounts of the good work the machine has been doing, from both Commissioner Lesley and Road Master Farmer.

Mr. H. E. Swabey, of Kissimmee, as in receipt of a letter from George Saunders, who with his good wife is residing at the Katalysine hotel, Gettysburg, Pa. Mr. Saunders expects to return to Florida some time in October, and states he is much improved in health. Mr. Saunders is well known in St. Cloud and has many friends here who will be pleased to learn of his improved health.

M. V. Cheesman returned to St. Cloud Saturday from Sanford, where he has just finished some building contracts. Mr. Cheesman announces that he will proceed at once to finish the new store buildings on Tenth street, near the City Hall, and that tenants will find stores ready for them by October 30th. This will be a great addition to the business district which has been growing east on Tenth street for some months.

W. L. Drawdy made a business trip to Keenansville Tuesday.

G. F. Smith has returned to the city after several days with friends in northern cities.

Mrs. Theodore Deschner arrived home Monday from a visit with relatives.

Mr. and Mrs. Hughes have returned from visiting with friends and relatives in Knoxville, Tenn.

Mr. D. Homer Jennings has returned to St. Cloud after an extended trip to Bridgeport, Conn. Mr. Jennings is glad to get back among his old friends and where he can enjoy a real pleasant breeze all the time.

Mr. Ira B. Sawyer, after having his goods packed to move to California changed his mind this week and purchased a house of Leon Lamb, which includes lots 15 and 16, of block 242, and twenty acres of land in Section 2, Township 27, Range 30. Mr. Sawyer says California is pretty good, but after living here, when he started to move back across the country he thought this place was a little better than California and was going to stay.

LOYAL DAUGHTERS

The Loyal Daughters held their usual meeting at the beautiful home of Mr. and Mrs. Bullard, on the lake front, Friday, August 28th. A goodly number of the members were present and enjoyed the day. Although there was a shower in the morning the largest portion of the day was fine. A number of games at croquet and checkers were played, and after dinner was disposed of the Loyal Daughters were called to order and a short session was held. Mrs. Morseman tendered her resignation as press correspondent and it was accepted. Miss Avanelle Nourse was elected to the position.

Mrs. Strode read a letter of thanks to Mr. Marine and Mr. Mosier, and she also gave out clippings to be read by each of the members present. Mrs. Strode also collected as much money as she could to send away to the Johnson college in Tennessee.

The next meeting will be held in Oak Grove Park, on Friday, September 1st. Each member is requested to be present.

FOREST CONSERVATION

It is announced that conservation of the national forests is beginning to pay. Of course it paid from the very start. What the department means is that it is beginning to testify in dollars.—Cleveland Plain Dealer.

KISSIMMEE BAND TO GIVE A MINSTREL BENEFIT FRIDAY

Elaborate Program of Excellent Local Talent Arranged For Entertainment at Casino.

The Kissimmee Concert Band will have their first annual minstrel Friday evening at the Casino Theatre, at Kissimmee. For many weeks the members of the band have been holding regular rehearsals for the occasion and have developed some remarkable talent in the members. The songs, special musical numbers and other blackface stunts prepared promise to be a real treat for the citizens of the two cities who attend.

The money to be derived from this entertainment will be used to purchase new instruments for the band, which has been of much service to the county since its organization. Improvements in the musical entertainments are planned for the next year, and the organization is deserving of the hearty support of all our people. St. Cloud people are urged to attend Friday evening. The prices are reasonable.

POPULAR YOUNG COUPLE WILL WED IN SEPTEMBER

Mr. and Mrs. C. W. Griffin, of Kissimmee, have issued invitations to the marriage of their daughter, Alma, to Mr. Henry Robert Stanley Bullock, Wednesday evening, September 13, at the First Methodist Church, Kissimmee.

Mr. Bullock is the eldest son of Mr. and Mrs. S. H. Bullock, of Kissimmee, and is assistant cashier of the Citizens Bank in that city. Miss Griffin has been associated with Sunday school work in Kissimmee for some time and is well known throughout the county. Both of these young folks are popular with a host of friends.

A CORRECTION

In last week's issue of the Tribune it was stated that the volunteer clean-up gathering at Wildwood Park would take place Thursday, September 7th. This was an error. It should have stated "Wednesday, September 6th." So, all who have volunteered will meet the boat at Decker's boat house with either an axe or grubbing hoe, on Wednesday, September 6th.

The word I like to see on paper is displayed. When monthly bills come back to me with that word on 'em "Paid."

EVERYTHING PRINTED IN THIS

FARM SECTION

IS OF INTEREST TO FARMERS

HELLEBORE KILLS
FLIES IN MANURE

Hellebore has been suggested as a substitute for borax in killing fly larvae in manure. It is contended by some authorities that borax may injure plant life if manure containing it is applied to the soil repeatedly. The supposition is that the borax will gradually accumulate until it reaches toxic proportions.

S. S. Walker, Associate Chemist to the University of Florida Experiment Station, calls attention to Farmers Bulletin 679, which contains results obtained by the United States Department of Agriculture by using hellebore. A half pound of this poison is added to 10 gallons of water, stirred and allowed to stand 24 hours. The resulting extract is sprinkled over the manure at the rate of 10 gallons to every 8 bushels or 10 cubic feet of manure. Experiments by the department show that from 88 to 99 per cent of the fly larvae were killed by this treatment.

It must be remembered that the amounts of borax recommended for a given amount of manure would not be injurious, but it is not known what effects it would have if that amount were applied to the soil year after year. It probably would be injurious. Furthermore, farmers are apt to use larger quantities than are recommended and thus hasten the accumulation. A discussion of the treatment with borax will be found in Farmers' Bulletin 118.

VALUE OF TESTED SEEDS.

The seed analyst of the United States Department of Agriculture says that he who buys or sows seeds without testing them or without having them tested deprives himself of information which may be of value in several ways. Buying seeds on the basis of a reliable test not only protects one against fraud and deceit, but also enables the purchaser to make a selection according to actual value. The influence of price will then assume proper proportions. Purity and germination, as indicated by such test, do not tell the whole story, but they are very important chapters.

Using tested seeds enables one to adjust the rate of seeding, and in some cases influences the selection of the area where the seeds are to be planted. The knowledge that the seeds sown will grow if soil conditions are favorable enables one to render a more correct interpretation of total or partial failure of the crop. Many times it is attributed to the seed, where later tests have shown the seed to be of good viability. Knowing the quality of the seed beforehand, proper attention can be given to soil conditions if it appears that these are the limiting factors.

UNDESIRABLE ROSES MAY
BE MADE OVER

Have you any scrub roses or any that loaf? Have you some that you wish were like some others you or your neighbors have? The quickest way to remedy the defects of undesirable roses is to make them over. The rainy season is the time to do it. F. F. Halma, Assistant Horticulturist to the University of Florida Experiment Station, suggests that the old bushes be budded to better varieties.

Anyone who has a sharp knife and a little horse sense can bud roses and produce flowers much earlier than from cuttings. The method used is known as shield budding. A vegetative bud is cut with a shield-shaped piece of bark from a desirable rose bush. A T-shaped cut is made through

the bark of the old bush. The corners of the bark made by the cut are turned back and the shield-shaped piece of bark bearing the bud of the desirable variety is slipped in. The corners are turned down and the wound made by the T-cut is bound with narrow strips of cloth.

The bud must protrude from the vertical slit and should not be covered with the cloth, but the bark of the stock should fit closely around it. The bud should be inserted as close to the ground as possible. When the wound has calloused the top of the stock should be taken off about an inch above the bud.

Of course budding cannot be done when the bark does not slip, but no trouble should be experienced during the rainy season.

Any sprouts that may come up in the rose garden may be rebudded and made into good roses also.

LIFE OF A QUEEN BEE.

The duration of the life of a queen bee is rarely more than three years. The greater part of the workers are supposed to live from one to nine months. The impregnation of the queen takes place high in the air and usually within a few days after she has emerged from the cell. It is the only occasion of her ever leaving the hive, except in swarming.

COTTAGE CHEESE MORE
NUTRITIOUS THAN STEAK

Some milk spoils in the best of refrigerators. The first thing to do when this happens is to cancel the steak order for the next day. This sour milk can be made into a delicious dish for the table. Cottage cheese contains more protein pound for pound than sirloin steak, and cottage cheese is made from sour milk. By the addition of a little cream the cheese will contain also more fat than the steak.

There is usually an excess of milk on every farm, while beef is rare. This excess milk can be made into cheese that will take the place of meat, and it should appear in the farm diet several times a week.

C. L. Willoughby, Professor of Dairying in the University of Florida College of Agriculture, suggests that farm wives need not wait for the milk to sour. A better quality of cheese can be made by using rennet or junket tablets. These can be had from most drug stores or from L. A. Davis & Co., Detroit, Mich., or other drug manufacturers. Twenty-five cents worth will last a month or two. Directions for use usually accompany the package. The rennet forms a curd much more rapidly than the acid organisms in the milk.

The milk must be held at room temperature until the curd forms. Then the curd should be broken and brought gradually to a temperature of about 100 degrees. It should be kept at this temperature and stirred gently until it becomes firm and the whey clears. After the heating, the curd is placed in a porous cloth bag to drain. When the water has drained off, break the curd and salt to taste. Addition of sour cream makes richer cheese.

COMMERCIAL PRE-EMINENCE

New York now leads all other parts of the world in commerce, being credited with an aggregate foreign trade which exceeds the commerce of London, second in rank, by \$200,000,000. In the matter of exports the pre-eminence of New York is even greater, says the United States Department of Commerce and Labor.

SOME ST. CLOUD LANDS
FINE FOR CELERY RAISING

Climatic Conditions and Water Supply Make
Location Ideal For Culture Un-
equalled in Kalamazoo

Comrade J. P. Bullard believes St. Cloud has some of the finest celery lands to be found anywhere in the country, and furnishes the Tribune with the following article from a Michigan paper, which Mr. Bullard thinks will be of interest to owners of lands in this section, and to persons contemplating purchases here:

(By Henry F. Thurston, in the Fruit Belt.)

Celery growing has assumed very large importance on the reclaimed swamp land around Kalamazoo, Michigan. Here fortunes have been made in growing this vegetable, and the profits made have stimulated the study of the celery plant and of the conditions under which it is grown. Business men of Kalamazoo take keen interest in the success of the celery crop for it means much to the thousands of workers dependent upon it.

One company of business engaged in the growing of celery is the "Kalamazoo Gardening Company," of which Mr. A. P. Garrant is secretary.

The Safe Plan

"Of our 112 acres of land," said Mr. Grant, "25 acres are devoted to the growing of celery. We might grow a larger area and get poorer plants, but that does not pay, though a good many people are following that practice. I believe that the safe game to play in celery raising is to produce only a first class article, and we do not undertake the cultivation of more land than we can handle in the best manner. The best quality of celery always commands a good price, and a man who grows only the highest quality is always sure of being able to dispose of his entire crop at a good price. But when a man produces the second rate quality of celery he is never sure as to prices; it all depends on how large the supply of first quality is."

"I could sell at a good price all the first quality celery I could raise if I had 1,000 acres of celery. If a man grows a big celery, the kind that weighs from fourteen to sixteen pounds from 14 to 16 pounds to the dozen, he will find any number of markets that will want it."

The Kind of Land Needed

To be successful in the growing of celery, one must have celery land. This consists of several feet of black mud underlaid by several feet of peat. The underlying peat is a great holder of water, and in dry weather the long roots of the celery go down after it. It used to be supposed that it was necessary to bring to the celery plant great quantities of water. Deep ditches were dug around the celery beds and now and then these ditches were stooped up and filled with water and the celery flooded. We have now learned that too much water is injurious and that it generally needs the help of drain tiles rather than floods of water. All of our celery land is thoroughly tiled.

Sowing the Seed in Seed Beds

"When a man shall sow his seed depends on whether he is trying to grow just one crop or a succession of crops. We try to grow just one crop, and most of the men that are trying to do the big thing in celery growing are growing but one. The men that try to have celery all the time plant their first seed in March in hotbeds or hot-houses. But we do not plant our seed until we can do it in the open ground and it is fairly certain that no killing frosts will injure the young plants. Generally the weather is mild enough by the 1st to 14th of April."

"We sow in seed bed, broadcasting by hand and thin enough that each plant will have an opportunity to develop. If each seed has a square inch of space it can make a good stocky plant by the time it has to be transplanted. We locate the beds near water, so that the plants can easily be watered if dry weather comes. They will not stand drouth at that stage, for they are not rooting deeply enough. One pound of seed will produce plants enough to set from four and a half to five acres of land."

Transplanting

"We begin transplanting as soon as

the plants are big enough, usually by June. We set the plants four inches apart in the rows, making the rows four feet apart. The distance apart of the rows is regulated by the plan one has for the blanching of celery. If a man intends to blanch his own celery by means of boards he can have his rows three feet apart but if he expects to one-fourth blanch and sell to cold storage houses who will complete the blanching, he will have to leave four feet of space between the rows to give dirt enough for ridging up to get the amount of blanching he is required to do.

Applying Fertilizer

"When the plants are well established in their new location and are growing well we apply our commercial fertilizer at the rate of 250 pounds to the acre, drilling it on both sides of the little plants without injuring any of them."

"I use a complete fertilizer high in nitrogen as well as potash. It may be said that this muck soil is full of nitrogen, and that is doubtless so; but we do not know how much of it is available; we cannot afford to take chances with an expensive and profitable crop of celery. If, after a few weeks, the plants do not seem to be doing well we give them another application of 250 pounds of fertilizer. When we formerly used commercial fertilizer alone we followed the practice of putting it on with a fertilizer distributor before the plants were set; but now we work a good deal of light horse manure into the soil to lighten it up. I specify, when I buy my horse manure, which we get from Chicago by the car load, that it shall contain a large amount of straw."

Cultivation

"Cultivation is of great importance in the development of the crop, and we keep our cultivators going about all the time. If the weather is favorable we cultivate once a week; but if rains prevent the progress of the work, sometimes the cultivations are not oftener than once a week, but if rains prevent the progress of the work sometimes the cultivations are not oftener than once in two weeks; this ceases when the plants are a little more than half grown, as they can take care of themselves after that."

"We use horses for cultivating and one man should be able to cultivate five acres a day and take all the time needed to do the work without injuring the plants."

Blight, Enemy Most Feared

"This season we are alarmed lest the blight, the greatest enemy of all celery growers, shortly appear in our fields. The long continued wet weather is very favorable to it, if the disease is followed by hot weather. Celery blight is a trouble we no longer know how to fight. We used to be told that we could spray for it, but we abandoned that. I doubt if anyone knows much about it or how it can be prevented."

Gathering the Crop

"We begin our harvest early in October, though in some years a part of crop has been ready to go to the market during the last two weeks in September. We have a way of our own in cutting celery. We took a horse cultivator and removed the teeth and put in their place a sharp piece of steel that passes through the plants, cutting them off and leaving their roots. The appliance can be raised and lowered like a cultivator."

"We pack the plants into California crates without washing or bunching them. We sell our entire output to companies that put them in cold storage to blanch. In the cold storage houses it is kept at from 33 to 35 degrees and as dark as possible. The celery blanches rapidly; but it is not considered safe to keep it longer than two months."

Yields and Profits

"As to yields, there is a great variation even with us. If all plants grew we should, of course, be able to tell beforehand just how many dozen we should have, but celery plants are very delicate and even with the best of care and management, several thousand will perish from each acre or make such poor growth that they have to

be discarded. We generally get about 21,000 dozen."

"The prices paid to celery growers in this locality vary enormously. Some are content to grow inferior celery and get ten cents a bunch for it, but I have known men to get as high as 40 cents a bunch. We figure on getting about 20 cents a bunch, which brings the gross receipts per acre to approximately \$400. But it is very easy for a man to so badly damage his celery growing that three-fourths fourths of his receipts will be swallowed up by expenses. There are, however, large profits in the growing of celery if rightly managed."

VELVET BEAN CATER-
PILLARS DUE TEN
DAYS AFTER MOTH

Velvet bean caterpillars are due in about three days after the first moths appear. They will begin to damage the crop in 10 or 12 days. That will be some time during July, August or early September, depending on the section of the State. They are not usually numerous enough to injure the crop until late August or September, but the appearance of the moth is a warning that something must be done.

According to J. R. Watson, Entomologist to the University of Florida Experiment Station, this is the only serious insect enemy of velvet beans in Florida. While it is destructive to the crop and will defoliate the vines, it may be controlled easily and at comparatively low cost. The insect has a great many natural enemies and it is only necessary to supplement the work of these enemies to obtain complete control. A fungus disease known as cholera can be depended on to keep the caterpillars in check by October and sometimes in September.

The farmers' part of the program comes during the early part of the infestation before the cholera begins work. Materials for spraying or dusting should be ordered as soon as the moth is noticed. Directions for control will be found in Bulletin 130 of the Experiment Station, Gainesville.

PROPAGATE GUAVAS
FROM BEST TREES

Guavas are like all other fruit trees. Some are good producers and bear excellent fruit. Most of them are loafers and produce fruit of poor quality or small quantity. Most of the fruiting guava trees in the State are seedlings, and as a result the crops produced from them are extremely variable. Guavas come fairly true to seed when the class is considered, but there is a marked variation in quality and productiveness of individual trees.

P. H. Kolls, Dean of the University of Florida College of Agriculture, suggests that anyone who wishes to start a guava orchard should select rot cuttings from trees with known performance. In this way the uncertainty which always attends planting of seedlings can be eliminated.

There are three classes of common guavas. One is the table guava, which is used for desserts, canning and preserving. Another grows large fruits and is known as the Sweet Brazilian, or South American. It is inferior for jelly or dessert and not as good for canning and preserving as the table guava. The third class is used for making jelly almost exclusively. The fruits are rather small and have pinkish or whitish flesh and are very tart. The Catley guava belongs to a different group.

OVER-RIPE CROPS
MAKE WOODY HAY

A man who is very enthusiastic over a certain hay crop submitted figures on the chemical analysis of that crop and that of a well-known hay. He ran down the list and indicated that the two compared favorably. "And here," he said, pointing to an item in the analysis of his favorite, "the fiber is almost 10 per cent greater."

This man did not know it, but he was pointing out the weak place in his hay. High percentages of foods in hays are desirable, but everything that appears on the analysis is not desirable. If other conditions are equal the larger the percentage of fiber the poorer is the hay. Fiber is largely indigestible and the more there is in hay the smaller will be the percentages of valuable food elements.

The fiber in a crop can be controlled by the hay maker to a large extent. John M. Scott, Animal Industrialist to the University of Florida Experiment Station, reminds farmers that the percentage of fiber increases 20 to 25 per cent from the time the first bloom appears until the seeds are nearly ripe. The longer a crop stands after it reaches the cutting stage the woodier and consequently the less valuable for hay it becomes.

COMMUNITY CAN
CONTROL MOSQUITOES

Do you know that the mosquito which sang his blood-thirsty song in your ear last night was bred in your neighborhood? Mosquitoes are loath to wander, and if they can find a host that will entertain them, will not travel more than a quarter of a mile. They may drift a few miles with the wind, but the blame for mosquitoes in any community can be placed with that community. The malaria mosquito is less inclined to travel than the ordinary mosquito.

Mosquitoes breed in stagnant water. They will not be found in running streams, except, perhaps, in pools of still water at the shore. They do not reach maturity in streams or ponds stocked with fish for fish feed on the larvae. Their favorite breeding places are in water that is too filthy for fish to live in, in open sewers, ponds, mud holes, tin cans, rain barrels, cisterns and clogged eaves troughs.

Any community can control the mosquitoes by concerted action, according to J. R. Watson, Entomologist to the University of Florida Experiment Station. Swamps and pools which contain stagnant water should be drained and open sewers should be covered. But even when this is done the tin cans, rain barrels and other receptacles which hold water will supply breeding places for enough mosquitoes to stock the whole neighborhood. These receptacles are usually overlooked, because they are not so noticeable. Every place that holds water several days should be drained or covered.

QUININE.

The first extraction of quinine from the bark of the tropical cinchona tree by two French chemists in 1820 marked an epoch in the medical world, according to the Indianapolis News, and it was Sir Clements Markham of England, burned to death recently in his eighty-sixth year, who in 1852, after a visit to Peru, persuaded the British Government to plant and raise the drug in India at a time when malaria was seriously harassing the population there.

TRADE MARK REGISTERED

PHOSLIME
FOR
CITRUS FRUITS

"My grove ought to be a living advertisement for your Phoslime. I have used it two years, and have also used a fair quantity of Sulphate of Potash and Nitrate of Soda. This year, in spite of the drought, the trees have kept their dark green color all through and the crop of fruit will be the largest I have yet had."

ADMINISTRATOR'S NOTICE TO SELL REAL ESTATE

IN COURT OF THE COUNTY JUDGE,
STATE OF FLORIDA.
In re Estate of J. Osceola County.
Deceased.

Notice is hereby given to all whom it may concern, that A. E. Drought, as Administrator of the Estate of Ferdinand Schellachmidt, deceased, will, on the 29th day of September, A. D. 1916, apply to the Honorable T. M. Murphy, County Judge in and for said County, at his office in Kissimmee, in said County, at 10 o'clock a. m., or as soon thereafter as the matter can be heard, for authority to sell, at public or private sale, the following described real estate, to-wit: Lot Seven (7), Block Three Hundred and Three (303) of the Town of St. Cloud, according to Plat of said Town filed in the office of the Clerk of the Circuit Court in and for Osceola County, and recorded in Plat Book "B", Pages 33 and 34. Which application will be based upon the petition for such sale now on file in said Court. Dated 18th day of August, A. D. 1916.

A. E. DROUGHT,
Administrator.

NOTICE OF APPLICATION FOR TAX DEED UNDER SECTION 574 AND 575 GENERAL STATUTES OF THE STATE OF FLORIDA.

Notice is hereby given that W. G. King, purchaser of Tax Certificate No. 3 dated July 1st, A. D. 1916, has filed said certificate in my office and has made application for Tax Deed to issue in accordance to law. Said certificate embraces the following described lands, lying and being situate in Osceola County, State of Florida, to-wit: Beginning at the Northwest corner of the NW 1/4 of the NW 1/4 of Section Five (5), Township Twenty-six (26) South, Range Thirty-one (31) East, north 89° 29' East, East 690 feet, North 57° West 600 feet.

The said land being assessed in the name of UNKNOWN, at the date of issuance of said certificate. Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 31st day of September, A. D. 1916.

Witness my hand and official seal at Kissimmee City, Florida, this 22nd day of August, A. D. 1916.

J. L. OVERSTREET,
Clerk Circuit Court,
Osceola County, State of Florida.

NOTICE OF APPLICATION FOR TAX DEED UNDER SECTION 574 AND 575 GENERAL STATUTES OF THE STATE OF FLORIDA.

Notice is hereby given, that H. G. Merrill, purchaser of Tax Certificates Nos. 13 and 14, of Tax Sale of the City of St. Cloud, Fla., dated August 3rd, A. D. 1914, has filed said certificate in my office and has made application for Tax Deed to issue in accordance to law. Said certificate embraces the following described land, lying and being situate in Osceola County, State of Florida, to-wit: Lot Eight (8) of Block Three Hundred Thirty-two (332) and Lots One (1), Two (2), Three (3) and Four (4) of Block Three Hundred Thirty-five (335), all of the Town of St. Cloud, Florida.

The said land being assessed in the name of F. J. Ryan and S. H. Reid, at the date of issuance of said certificates. Unless said certificates shall be redeemed according to law, tax deed will issue thereon on the 2nd day of October, A. D. 1916.

Witness my hand and official seal at Kissimmee, Florida, this 23rd day of August, A. D. 1916.

J. L. OVERSTREET,
